

# IETF Hackathon: TAPS

- IETF 104
- 23-24 March, 2019
- Prague

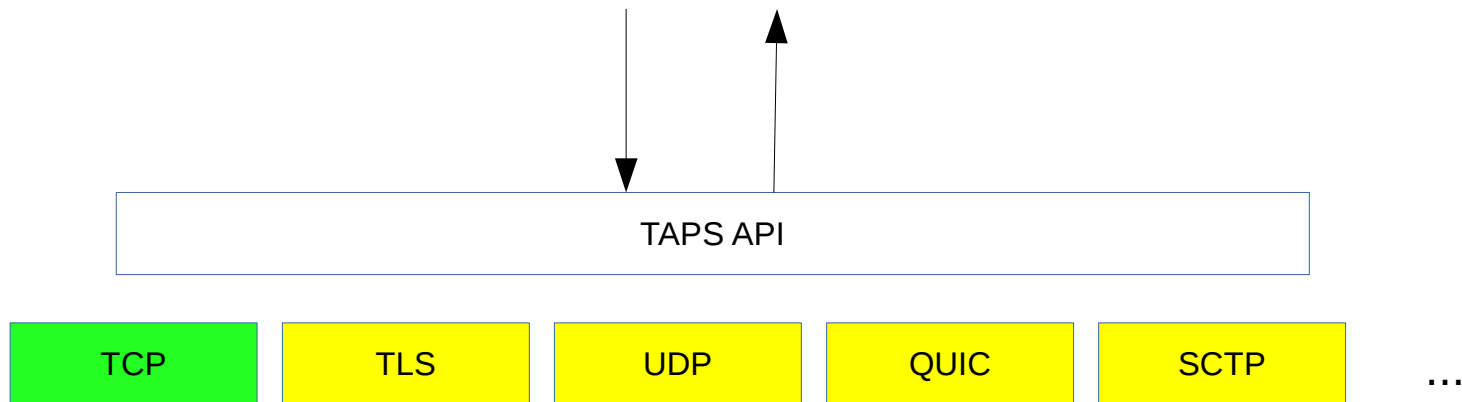

# TAPS (Transport Services)

draft-ietf-taps-arch  
draft-ietf-taps-interface  
draft-ietf-taps-impl

# PyTAPS: Hackathon Plan

Applications: testServer, testClient

<https://github.com/fg-inet/python-asyncio-taps>

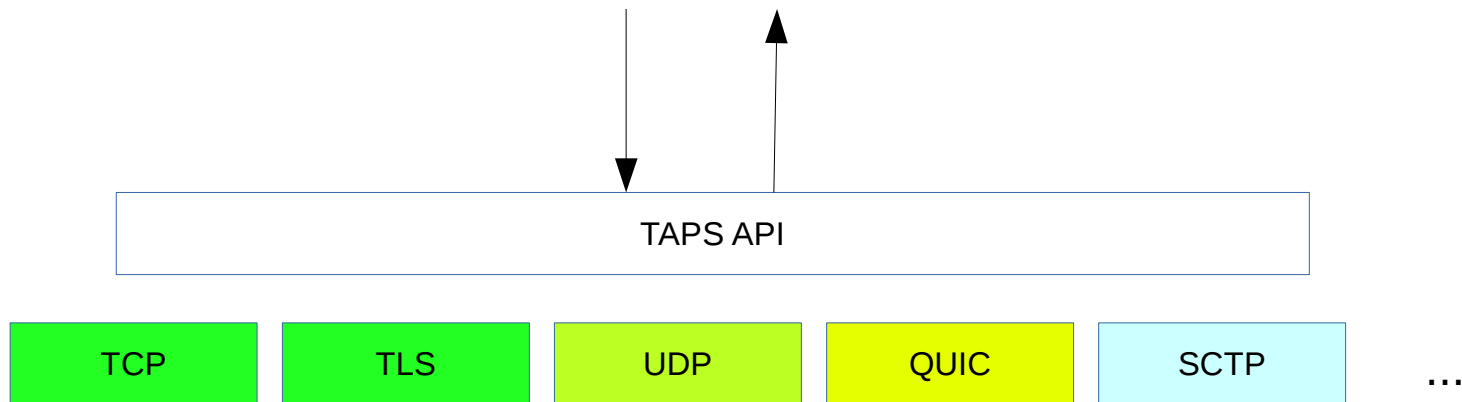

Supported

Planned support

# PyTAPS: What got done

Better CLI – Applications: testServer, testClient

<https://github.com/fg-inet/python-asyncio-taps>

- Supported
- Work in progress
- „We have an idea“

# What we learned

- Implementing TAPS with Python asyncio
  - Finding the right abstraction is non-trivial
  - Asyncio looks promising: TLS, Datagram, Stream
- Will take implementation experience to TAPS WG

# Wrap Up

## Team members:

First timers @ IETF/Hackathon:

Theresa Enhardt

Maximilian Franke

Philipp Tiesel

(TU Berlin)
